

# SoMEx APP

IS NOW READY ...

## Do you remember the SoMEx PROJECT ?

Young people have to be well prepared before going abroad for a mobility process and good preparation is the key point for integration!

The main objective of the SoMEx project was to create an android application based on an extensive tool-kit for preparation, operation and post processing for exchanges of trainees and staff related to up-to-date media, i.e. social media in use.

Trainees and staff might be involved in all stages of the processes, since user generated input in real time is of great advantage to lower the barriers of acceptance and the higher willingness of being part in exchanges.

Thus, the era of coming to classroom and the rule “turn of your devices” have to be rethought.

## LOOK OUT!
